Who we are

Eduvista Labs & Co. is a fictional education innovation studio created for platform testing. The company combines learning science, instructional design and digital technology to explore practical approaches for schools, universities and professional training organisations.

What we do

- Design digital and blended learning experiences.
- Prototype responsible uses of AI for teaching and assessment.
- Support faculty development and teacher training programmes.
- Develop learning analytics frameworks and evaluation models.
- Run workshops, research pilots and innovation labs.

Our goal: turn emerging research into learning experiences that are clear, inclusive and useful.

Capabilities

Learning Experience Design	Course architecture, interaction design, accessibility and learner journeys.
AI Learning Studio	Exploration of assistive AI workflows for educators and learning teams.
Learning Analytics	Dashboards, participation indicators and evidence-informed evaluation.
Research & Evaluation	Pilot design, qualitative research and impact measurement.

Meet us at New Trends in Teaching, Learning & Education

Visit Stand A - Innovation Area for short demonstrations, informal consultations and downloadable resources on AI, digital learning and evidence-based course design.
